

Case Study: Accelerating 72MG Studio's Digital Growth Through Strategic Consulting & Business Optimization

Executive Summary:

This project focused on strengthening 72MG Studio's digital presence and operational efficiency through strategic business consulting. The objective was to improve brand positioning, optimize digital assets, streamline customer communication, and enhance lead management. Our scope included strategic consultation, page optimization, market research, WhatsApp Automation, CRM implementation, and website optimization, creating a structured foundation for sustainable business growth.

Goals	Objectives
Strengthen brand positioning	Develop a clear and consistent digital strategy.
Optimize digital presence	Improve social media pages and website performance.
Enhance customer communication	Implement WhatsApp Automation for faster responses.
Improve lead management	Organize customer interactions through CRM.
Support business growth	Use market research to guide strategic decisions.

Background Context:

72MG Studio is a creative brand focused on delivering innovative services to its clients. To strengthen its digital presence and improve customer management, the brand required a structured strategy covering branding, digital optimization, customer communication, and lead management. Our role included providing strategic consultation, optimizing the brand's social media presence, conducting market research, implementing WhatsApp Automation, setting up CRM processes, and improving the website to create a seamless customer experience.

Problem Statement:

The business required a comprehensive digital strategy to improve brand visibility, customer communication, and operational efficiency. Challenges included optimizing digital platforms, managing customer inquiries efficiently, organizing leads, and strengthening the overall customer journey.

Risk	Alternative
Inconsistent brand positioning	Develop a clear digital branding strategy and maintain consistency across platforms.
Low customer engagement	Optimize social media pages and improve website experience.
Slow customer response time	Implement WhatsApp Automation for instant communication.
Inefficient lead management	Introduce CRM to organize customer data and follow-ups.
Limited market insights	Conduct regular market and competitor research to support business decisions.

Methodology:

The project began with a detailed business assessment, competitor analysis, and market research. Based on the findings, a digital strategy was developed to optimize the brand's online presence. Social media pages were reviewed and optimized, WhatsApp Automation was implemented to improve customer support, CRM processes were introduced for lead management, and website recommendations were provided to enhance user experience and conversion opportunities.

Analysis (SWOT Analysis):

Strengths	Weaknesses
Strong creative services and business potential.	Digital assets required optimization for better performance.
Opportunity to build a strong online brand identity.	Customer inquiries were managed manually.
Ability to integrate multiple digital solutions.	Lead management processes needed better organization.
Growing demand for digital creative services.	Limited data-driven decision-making before market research.
Oppor tunities	Threats
Increasing demand for digital branding services.	High competition in the creative industry.
Website optimization to improve conversions.	Changing digital marketing trends and algorithms.
CRM automation for better customer relationships.	Rising customer expectations for faster service.
Data-driven strategies through continuous market research.	Competitive agencies offering similar services.

Proposed Solutions & Implementation:

Solution	Implementation	Timeline	Expected Outcome
Strategic Consulting	Develop a digital growth roadmap based on business goals and market research.	Initial Phase	Stronger brand positioning and business direction.
Page Optimization	Optimize social media profiles, branding elements, and profile information.	Month 1	Improved professional appearance and audience trust.
Market Research	Analyze competitors, customer behavior, and industry trends to guide strategy.	Ongoing	Better business decisions and market positioning.
WhatsApp Automation	Configure automated greetings, FAQs, and lead responses.	Month 1–2	Faster customer communication and improved user experience.
CRM Implementation	Organize customer data, lead tracking, and follow-up management.	Month 2	Efficient lead management and higher conversion potential.
Website Optimization	Improve website structure, content flow, and user experience.	Month 2–3	Better customer journey and increased conversion opportunities.

Implementation Timeline:

Phase	Activities	Duration
Phase 1 – Research & Strategy	Business audit, competitor analysis, and strategic planning.	Month 1
Phase 2 – Optimization	Page optimization, WhatsApp Automation, CRM setup, and website improvements.	Months 2–3
Phase 3 – Monitoring & Improvement	Track performance, refine strategies, and optimize digital assets continuously.	Ongoing

Results:

Area	Success Metrics (KPIs)
Brand Positioning	Profile Visits, Brand Mentions
Customer Communication	Response Time, Customer Satisfaction
Lead Management	Lead Response Rate, Conversion Rate
Website Performance	Website Traffic, Bounce Rate, Session Duration
Business Growth	Qualified Leads, Customer Growth, Engagement

Conclusion:

Through strategic consulting and digital optimization, 72MG Studio established a stronger digital foundation for long-term growth. By combining page optimization, market research, WhatsApp Automation, CRM implementation, and website optimization, the brand improved its online presence, streamlined customer communication, and strengthened lead management. A data-driven approach and continuous optimization will support sustainable growth and enhance overall business performance.
